Keep safe, prevent infection

**Top Tips**
Things you can do to reduce the risk of infection

- Wash hands frequently and thoroughly
- Use hand sanitizer when you can’t wash hands
- Wipe down frequently touched surfaces/objects
- Physically distance yourself from others
- Avoid touching your head/face whenever possible

**Safety Measures**
Follow official procedures to help keep you and others safe

- Remind yourself of safe work procedures for your role
- Check if new processes have been introduced with your manager

**Personal Protective Equipment**
Using the right equipment prevents injury and illness

- Wear the appropriate PPE for the task you are doing
- Existing PPE guidance is still relevant for all UBC employee tasks
