Carpooling

Reduce the spread of COVID-19 while travelling with people outside your household. Please notify your supervisor if you carpool to work with others.

Before travelling to work

• Always complete your daily self-assessment.
• Travel with the same people each time.
• Please do not come to campus if you have:
  • Symptoms of COVID-19, or someone in your household is sick with COVID-19.
  • Travelled outside of Canada within the last 14 days.
  • Been asked to self-isolate by Public Health.

While carpooling to work

• Spread out as much as possible. If there are two people, the driver should be alone in the front.
• Wear a mask over your nose and mouth.
• Open the windows to let fresh air into the car.
• Set the vehicle ventilation system to bring in fresh air from outside. DO NOT recirculate the air.
• Have each person handle their own bags and belongings.
• Avoid eating or drinking in the car.

Cleaning and hygiene

• Clean your hands before entering and exiting the vehicle.
• Avoid touching your eyes, nose and mouth.
• Clean high-touch points such as seatbelts, knobs and controls, visors and door handles before and after each trip.
• If vehicles are shared on the job, clean between each shift.
• Keep tissues and hand sanitizer available in the vehicle. Practice cough and sneezing etiquette.
