

UBC COVID-19 Campus Rules

The UBC COVID-19 Campus Rules have now been retired and there are no general [COVID-19](#) requirements members of the UBC community must follow.

Learn more about UBC's communicable disease prevention framework:

<https://srs.ubc.ca/cdpf>

On May 5, 2022, the [World Health Organization declared that COVID-19 no longer qualifies as a global emergency](#). This announcement came alongside UBC's own transition to a communicable disease prevention framework.

Communicable disease prevention outlines how Public Health, UBC and individuals can work together to prevent the spread of communicable disease. It is intended to educate members of the campus community on such measures so that we all better understand the layers of protection. A communicable disease is an illness caused by an infectious agent or its toxic product that can be transmitted in a work, research or academic environment from one person to another (i.e. influenza, COVID-19, norovirus).
